Devoted Strangers: Managing Detachment in Skeptical Ethnography

Thursday, June 8th, 14:00-15:30

Humanities Building, Auditorium and Room 5

ABSTRACT

Much contemporary ethnography hopes to engage with a community to justify social critique. Whether from problem selection, interpersonal rewards, or a desire for exchange, researchers often take the “side” of informants. Such an approach marginalizes a once-traditional approach to fieldwork: that of the ethnographic stranger. I discuss the model of supportive engagement and present a model of scholarly detachment and questioning of group interests. Drawing on my own experiences and those of members of the Second Chicago School, I argue for an approach in which an unaffiliated observer questions community interests, arguing that skepticism of local explanations can discover processes shared by other scenes and can develop trans-situational concepts. While the ethnographer can be seduced into sharing a group’s perspective, observational distancing can mitigate this. In an approach I label skeptical ethnography, the ethnographic stranger avoids partisan allegiance in the field and at the desk. Skepticism of local interests must be combined with an epistemic generosity that recognizes that all action, whether seemingly righteous or repellent, responds to an interaction order.

The Corporeal Life of Commerce at Sea

Friday, June 9th, 14:00-15:30

Humanities Building, Auditorium and Room 5

ABSTRACT

The everyday life of seafarers steaming across Arab seas and serving Arab ports today is shaped not only by their daily interactions with one another and with their officers (who are often of other nationalities), but also by the corporeal transformations they experience in their sensory relationship with the sea and the stars, the weather, and the technology around them. The body of the seafarer is the fulcrum upon which global and workplace asymmetries of power, long traditions and conventions of seafaring, and gendered and racialised subjectivities all conjoin in complex and unexpected ways. I will speak not only of wages stolen and hunger ships managed by rapacious and unregulated shipping companies or the affective power of loneliness and loss at sea, but also the ephemeral moments of joy and solidarity forged aboard ships, and of the pleasures of arrival at ports. In focusing on the corporeal life of commerce at sea, I pay heed to exhortations of feminists and scholars of racial capitalism to centre the lives of those forgotten or dismissed at the conjuncture of capital accumulation and raced and gendered hierarchies.

Inspired by both the literary and scholarly works, in this lecture, I will reflect on the lives and bodies of modern seafarers in the western Indian Ocean. Drawing on ethnography aboard containerhips steaming Arab seas, the archives of various missions to seafarers serving Arabian Peninsula ports, local and global union cases on their behalf, and other literary and archival documents in Arabic and English, I will consider the quotidian life of labour, tedium, longing, and camaraderie aboard ships today. Perhaps most important, I will show that to think about commerce at sea, we have to locate the Arab world's economy in a global network of capital accumulation, and to seek in the macropolitical sweep of history the human-sized, the everyday, the embodied experience, and the affective lives of the people who make such commerce possible.

Gary Alan Fine - “Etnografia e Società”

Friday, June 9th, 19:30-21:00

Sociology Building, Kessler Room

In his remarkable career, Gary Alan Fine always managed to combine theoretical reflection, empirical research, and careful consideration for ethnographic methods. These are the three elements around which is organized "Etnografia e Società," a book that collects some of the most relevant essays by Fine translated into Italian to introduce students to ethnography and qualitative research. Starting from this theme, the meeting will be an occasion to develop a discussion about the teaching of sociological theory and ethnographical methods.

Chair:

Prof. Marco Marzano (University of Bergamo)

Speakers and book editors:

Ghita Bordieri (University of Genova), Giovanni Zampieri (University of Padova)

Discussant:

Prof. Andrea Cossu (University of Trento)

Video-Documentary Presentation and Discussion

Transmission and Transformation

An ethno-musicological study of the Italian-Canadian community of Toronto

Friday, June 9th, 19:30-21:00

Sociology Building, Room 20

An original video is presented as a result of an experimental inquiry carried out in Toronto from October 2018 through May 2019. The interviews with individuals from three historical migration waves address the topics of how problematic it is to acknowledge the common Italian denominator(s) toward a definition of music identity; what is nostalgic and what is 'real'; how, and to what extent it is possible to recognize such common element(s) as part of today's culture, through a fluid perception of space/time and temporality.

Two of the most relevant questions about the Italo-Canadian migration history are related to colonialism and diaspora awareness (for political, religious or economic reasons). The musical functions are connected with two different ways of understanding the process: the musical annexation of a new homeland and the reminiscence of the lost homeland.

Toronto is one of the cities with the highest density of Italian ethnicity in the world. Theatres, music hall, and schools of music, which are part of an extended social ritual participation, were built in the XX century, with the aid of large Italian workforce and labour. The adjective, "Italian" includes people from different regions, with their own specific language and dialect, without a consistent integration in-between.

This independent research is carried out in collaboration with ICAMus, The International Center for American Music.

The video screening will be followed by debate and discussion between the videomaker and the anthropologist Nicholas Harney. Nicholas Harney is Professor of Anthropology and currently Dean of the Faculty of Social Science at the University of Western Ontario.

Prof. Harney investigates the social anthropology of urban life, migration studies and critical perspectives on global processes with a focus on Canada and Italy. He is the author of *Eh, Paesan!: Being Italian in Toronto* (University of Toronto Press) and *The Lucky Immigrant: The Public Life of Fortunato Rao* (CITD, University of Toronto/MHSO)."
